Here at Southwark Playhouse we have committed to the SME climate hub, which helps small businesses reduce their carbon footprint. To do this, we've been working hard over the last year to find local products for our bar that meet our high standards, with the objective of finding ones that are the same or better than before. You're holding the fruits of that labour – so while you're enjoying a freshly poured IPA or ice cold G&T, you can be sure that we've taken steps to make it as green as possible. So far, we've reduced our carbon footprint by 76% and we want to do more!
